What is Affiliate Marketing?

Affiliate Marketing is basically getting paid commissions by recommending products or services to others. For example, if you recommend a hotel for your friend to stay for a night you won't get paid. However, in affiliate marketing, you'll get paid when you recommend people to that hotel.

Let me list down some of the potential you can expect from affiliate marketing:

- ✓ Make money online in absolutely any niche of your choice
- ✓ Quit your job, make a full-time living online and live a laptop lifestyle
- ✓ Multiple passive income streams
- ✓ Absolutely no coding, sales or any experience needed
- ✓ All you need is a laptop, an internet connection and the right system (which I'll be revealing to you in this blueprint!)

The Proven 4-Step Affiliate Marketing Blueprint

Affiliate Marketing is huge but to clarify things **I've broken it down into 4 main steps you can easily follow.**

These 4 steps have been used by thousands of successful affiliate marketers who have built their own successful affiliate marketing businesses online.

Let me uncover how this system works!

Step 1: Choose an Interest

This interest will be the topic that your website is going to be about. In a more professional term, it's called a "niche".

For example, let's say you're good at playing piano can be your niche. I'm sure there are a lot of people who are struggling with playing piano as a beginner and are willing to spend money in this niche.

HOBBY » NICHE

However, here's the catch...

You need to target a narrower niche to begin with, so you can see faster results.

In playing piano niche, you can choose a narrower subject like "How to play piano as a beginner?", or "How to become a professional piano player in 6 months?" or even "How to play piano with your eyes closed?".

All these can be a profitable approach as long as you have some experience and knowledge to share.

There will be people who are willing to spend money on this kind of course or product.

Another way to look at this is to **focus on helping people to solve a problem**. Just like weight loss is a very popular niche because a lot of people have this problem and are looking for help. So, your first step here is to choose a topic of your interest so you can start HELPING others ASAP.

Step 2: Build a Website

Don't be frightened by the term "build a website"!

Regardless of your age or experience level, **building a website is as simple as opening up a Facebook account** and editing a Word Document. It is LITERALLY that easy!

You don't need to know a single line of code because there are platforms out there for you to **build your website within a few clicks** and you will be up and running in a couple of minutes.

BUILD A WEBSITE

In fact, website building is one of the easier tasks today. Because websites are so popular and easy-to-build.

The **real Make Money Opportunity** is in the higher-level tasks like marketing and sales. These as simple as a few clicks, that's why money is there. But worry not, follow my guidance and you can't go wrong.

Step 3: Attract Visitors

After your website is set up properly, the next step is definitely to **bring in visitors**, or also known as “traffic”, to your website.

Without traffic, there'll be no potential customer and definitely no sales.

There are 2 main types of traffic:

1. Paid Traffic
2. Free Traffic

Paid Traffic is also known as Direct Response Traffic, which means your goal is to make 2 dollars back when you invest \$1, so on and so forth.

Some examples of paid traffic include: Pay-Per-Click (PPC), Facebook Ads, Instagram Ads, etc.

Free Traffic is also known as “organic traffic”, is what we will aim for...

Our goal is to show up (rank) on search engines like Google, Bing or yahoo for "free traffic" so you can “Attract” visitors that will find your website by typing keywords in their research.

Now the first step is to focus on setting up your website, then you'll be guided on what you need to do to "lure" relevant visitors and convert them into buyers.

Step 4: Earn Revenue

Our ultimate goal is not just to make money, but **making consistent passive income** so that we can achieve financial freedom, right?

You'll be able to do that with your website.

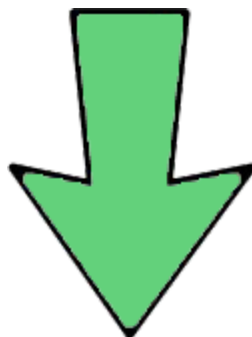

Below are the 6 Main Ways which you can use to monetize (make money from) your site:

1. Affiliate Programs
2. AdSense Ads & Other Advertising Programs
3. Building a List
4. Amazon Products
5. Relevant Advertisers
6. Create Your Own Product

([Read this guide](#) to learn how these 6 methods work)

All you need to know right now is that there are **tons of ways for you to monetize your website**. Basically, **you can make money just by sharing what you know** and your experience with the right audience.

The flowchart in the next page summarizes the whole process:

“Information is a source of learning. But unless it is organized, processed, and available to the right people in a format for decision making, it is a burden, not a benefit.” - William Pollard

Our job as an internet marketer is to organize & process the necessary information in the right format and put it in front of the right audience at the right time!

YOUR NEXT STEP

We're just at the tip of an iceberg for affiliate marketing. But you've already taken a huge step going through this 4-Step Blueprint. There are a lot of tiny details but ultimately, they all come back to these 4 main steps.

I thank you for that because **your time is something I do not take lightly**. I hope my blueprint has been helpful so far and has given you a very clear big picture for this type of business.
